 Aleman For Medical
And Scientific Services

ALEMAN

FOR MEDICAL AND SCIENTIFIC SERVICES

Integrity

Integrity resides at the heart of our company. We uphold the highest ethical standards and operate with transparency, honesty, and accountability in all our endeavour. We ensure ethical practices and responsible business conduct for stakeholders.

Vision

Our vision is to achieve sustainable growth in chemicals and its derivatives national and international markets by offering world class products. Through continuous development, and investments in medical and scientific field.

Mission

ALEMAN mission is to be a major company in the field by providing all its customers locally and globally with products and services with the highest quality standards to meet the market needs & standards while remaining true to our core values.

It is our purpose to share with our customers and stakeholders a basis of commitment and mutual trust, focused on consolidating long-lasting relationships.

We aim to optimise our products quality processes, enhance efficiency, and ensure the highest standards of safety and sustainability.

OUR IMPORT SECTION

As we said the company focuses on being more influential, responsive and competitive in order to achieve one of our main goals which is to provide world class solutions in medical and scientific field.

One of our ways to achieve this is by providing a truly high quality products by dealing with a large and high quality companies to offer much varieties to our customers.

Liofilchem is an Italian company that produces microbial identification and susceptibility testing systems, MIC Test Strip, antibiotic discs in cartridges, dehydrated culture media, selective supplements, ready to use culture media in petri dish, tube, bottle and dip-slide, systems for the chemical and microbial screening in food, bio-indicators for sterilization process control systems.

Tody Labs is a Romanian company that currently runs a diagnostic laboratory that produces and delivers different services: External Quality Assessment Schemes - EQAS: for Clinical Chemistry, Coagulation, Hematology, Hepatitis, Hormones, Infectious Diseases, Tumour Markers, Microbiology, Parasitology, Serology, Transfusion, ESR, Urine Chemistry and others

- Reference Strains intended for internal quality control in microbiology laboratories and other Internal controls for biochemistry, coagulation, hematology, immunology and urine.

COMING SOON

Since 1993 Tody Labs. has been featured in Reference Strains intended for internal quality control in microbiology laboratories and other Internal Controls for biochemistry, coagulation, hematology, immunology and urine.

COMING SOON

Since 1983 Liofilchem has committed its Research and Development department to the production of reliable and high quality bacteriology products. The Liofilchem products are used in clinical and industrial microbiology laboratories in over 130 countries.

Some of Lab Equipments & Tools :

MICRO PIPETTE

ANTIBIOTIC DISC

MEDIA SUPPLEMENTS

LAL WATER LAL TEST

BLOOD CULTURE

ATP SWABS

PREPARED MEDIA

KITS

PARAFILM

CLEAN TEST SWABS

STOMACHER HOLDER&BAG

PH Electrode ADWA

Some of Lab Equipments & Tools :

ALFATOXIN M1

Electronic Pipette Controller

Dispenser

ANTIBIOTIC DISC IN CANISTER

Anti- Salmonella

BIOLOGICAL INDICATOR

Strip Control

B-Lactames

Sponge Swab

Membrane Filter

Strip Control

Petri Dish "All Sizes"

MERCK

LIOFILCHEM

Culture media is a gel or liquid that contains nutrients and is used to grow bacteria or microorganisms. They are also termed growth media. Different cell types are grown in various types of medium. Nutrient broths and agar plates are the most typical growth media for microorganisms.

Some microorganisms or bacteria need special media for their growth.
